

STUDY PREPARATION WORKSHOPS

that assist and support participants to access alternative pathways into tertiary study.

During these workshops you can:

- Understand and explore what University is really like
- Develop your skills (like note taking and essay writing) to feel confident about enrolling in further education
- Meet the friendly team who support you to balance study, family and personal life

The Uni4You project provides assistance and guidance with enrolling into FREE tertiary preparation programs (Open Foundation, Yapug and Newstep) that begin in 2020.

These programs help you to develop the skills needed for study at a tertiary level, and provide a free qualification which you can use to gain entry into university.

"Uni4You helped me make life changing decisions for myself and my family."
